**OUTLOOK**

U.S. Treasury yields remained robust despite various headlines risks. From July to early September, the 10-year Treasury had been in a relatively tight range of 1.20% to 1.40%. In the latter part of September though, rates rose after Fed voiced their tapering plans and confidence increased.

Yields continued their upward momentum as the Federal Reserve moves closer to easing off its pandemic-era policies. The rise in yields has also come as rising wages and supply chain issues have fueled fears of inflation. Although higher inflation is still expected in the near term as the economy gets back to normal, the current inflation pressure should help boost consumer demand and consumption, driving economic growth.
