OUTLOOK

ROP Sovereign Bond prices ended the month in negative territory as U.S. rates moved higher. The Federal Reserve's (Fed) hawkish guidance and strong jobs data pushed market participants to price in another rate hike for the year, and price out rate cuts to mid-2024. The Fund currently maintains a duration close to the benchmark with heavy allocation to ROPs. It will look for opportunities to increase duration through U.S. Treasuries as rates begin to top out. On a gross-of-fees basis, the Sun Life Prosperity Dollar Abundance Fund underperformed the benchmark year-to-date due to security selection.
