INVESTMENT OBJECTIVE AND STRATEGY

The *Maybank Tiger Dollar Bond Feeder Fund* primarily aims to provide capital appreciation by investing in a single collective investment scheme, called the Target Fund. As a feeder fund, 90% of its assets shall be invested in the Target Fund which is the Sun Life Prosperity Dollar Abundance Fund. The Target Fund is primarily invested in moderate risk portfolios of US Dollar-denominated fixed income instruments issued by the Philippine government, other major economies or corporations operating therein or through diversified investment companies invested in such securities. The remaining portion of the assets (maximum 10%) will be invested and reinvested by the Trustee in investment outlets allowed under the regulations of the BSP.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The *Maybank Tiger Dollar Bond Feeder Fund* is suitable for clients with moderate risk profile and medium-term investment horizon. This Fund is for clients who desire potential higher returns in US Dollars.

OUTLOOK

The COVID-19 pandemic has caused economic hardship across the United States and around the world. Economic activity and employment have picked up in recent months but remain well below their levels at the beginning of the year. Weaker demand and significantly lower oil prices are holding down consumer price inflation. Overall financial conditions have improved in recent months, in part reflecting policy measures to support the economy and the flow of credit to U.S. households and businesses.

The 10year US Treasury bond yield was lower by the end of September trading at 0.686% compared to last month's 0.706% figure. Yields fell as bond managers bought debt as part of the routine rebalancing operations before the end of the month, capping off a volatile month that saw long-term government bond rates turn higher staging a rally in August.

The U.S. unemployment rate fell to 8.4% in August from 10.2% in July, the Labor Department's closely watched employment reports but employment growth slowed further last month and permanent job losses increased as pandemic relief money from the government started running out. The slowing decline of the number of Americans who applied for jobless benefits could be a sign that the labor market is experiencing a setback amid another wave of corporate layoffs.

Federal Reserve chair Jerome Powell said despite the economic recovery having progressed more quickly than expected, "overall activity remains well below its level before the pandemic and the path ahead remains highly uncertain." He also does not see interest rates rising above zero for many years, possibly until 2023 and beyond.

The fund will continue to invest in medium-term investments with relatively stable and reasonable returns.
