**INVESTMENT OBJECTIVE AND STRATEGY**

The Maybank Tiger Dollar Bond Feeder Fund primarily aims to provide capital appreciation by investing in a single collective investment scheme, called the Target Fund. As a feeder fund, 90% of its assets shall be invested in the Target Fund which is the Sun Life Prosperity Dollar Abundance Fund. The Target Fund is primarily invested in moderate risk portfolios of US Dollar-denominated fixed income instruments issued by the Philippine government, other major economies or corporations operating therein or through diversified investment companies invested in such securities. The remaining portion of the assets (maximum 10%) will be invested and reinvested by the Trustee in investment outlets allowed under the regulations of the BSP.

**CLIENT SUITABILITY**

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Maybank Tiger Dollar Bond Feeder Fund is suitable for clients with moderate risk profile and medium-term investment horizon. This Fund is for clients who desire potential higher returns in US Dollars.

**KEY RISKS AND RISK MANAGEMENT**

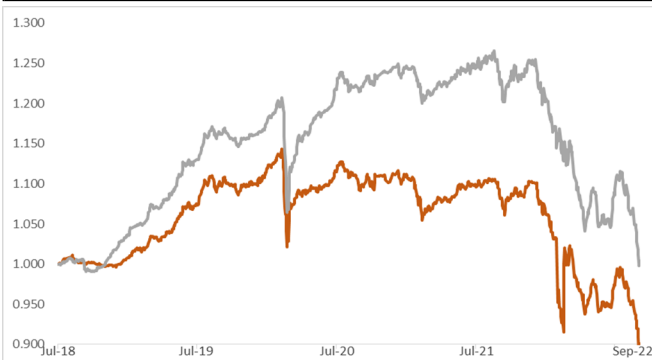

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Interest Rate Risk:** The possibility of an investor to experience losses due to changes in interest rates.

**PORTFOLIO COMPOSITION**

**OUTLOOK**

ROP Sovereign Bond prices dropped as U.S. Treasury yields climbed and credit spreads widened. U.S. inflation proved to be sticky as August print came in at 8.3% year-on-year or 0.1% month-on-month (versus - 0.1% exp). The elevated inflation print paved the way for the Fed to hike rates by 75 basis points (bps) to a target rate of 3% to 3.25%. In the presser after the announcement, Fed Chair Jerome Powell reiterated the Fed's stance that it will do whatever it takes to bring inflation back down to the target level. Risk assets, including ROPs, sold off last month on expectations of more aggressive Central Banks and on prospects of recession. Given the volatile environment, the Fund will maintain its abundant cash. It will be ready to deploy in case credit spreads widen further. The Dollar Abundance Fund outperformed the benchmark (-19.41%) year-to-date (+125 bps) due to its underweight duration stance against the benchmark.
