**OUTLOOK**

Philippine government bonds rallied over the month of December on the back of the Federal Reserve's (Fed) dovish pivot, and limited supply issued by the Bureau of the Treasury (BTr). During its Monetary Board (MB) meeting, the Bangko Sentral ng Pilipinas (BSP) kept its policy rate unchanged at 6.5%. However, the Central Bank maintained its hawkish tone, and reiterated their readiness to hike policy rates anew if warranted. For the month of December, inflation softened further to a headline print of 3.9%, which is within consensus expectations. This marks the first time in 20 months that headline inflation printed within BSP's 2-4% target band. The Fund currently maintains a duration that is overweight to the benchmark. It will look for opportunities to increase duration on corrections. On a gross-of-fees basis, the Fund leads the benchmark year-to-date due to overweight duration positioning.
