INVESTMENT OBJECTIVE AND STRATEGY

The *Maybank Tiger Peso Money Market Feeder Fund* primarily aims to prevent the loss of principal and to generate income by investing in diversified Philippine peso-denominated short-term portfolios suited for clients with at least a moderate risk appetite. The Fund is structured as a Feeder Fund. As such, 90% of its assets shall be invested in Sun Life Prosperity Money Market Fund. The remaining portion of the assets (maximum 10%) will be invested and reinvested by the Trustee in short-term tradable fixed-income instruments, bank deposits, and other investment outlets allowed under the regulations of the BSP.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The *Maybank Tiger Peso Money Market Feeder Fund* is suitable for clients with at least a moderate risk profile and a short-term investment horizon. This is for investors who are not willing to take excessive risks yet but desire to avail of potential higher and competitive rates brought about by relatively safe and liquid investments.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk. The possibility of an investor to experience losses due to changes in interest rates.

Market Risk. This is the possibility for an investor to experience losses due to changes in the market prices of securities.

Inflation Risk. This is the risk that arises from the changes in purchasing power due to inflation.

Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

Reinvestment Risks. This is the possibility that an investor may experience losses due to probable lower returns or earnings when maturing funds or the interest earnings of the Fund are reinvested.

Other Risks. Participation in the Fund may also be further exposed to any actual or potential conflicts of interest in the handling of in-house or related party transactions by the Trustee.

OUTLOOK

Inflation inched down to 4.5% in March, following February's 4.7%. The decline was attributed to stable weather conditions which slowed down price movements of vegetables, fruits and fish. Meanwhile, Metro Manila and nearby provinces have been placed in stricter quarantine restrictions due to surge in coronavirus cases amid ongoing vaccinations.

With inflation still beyond the government's target range of 2 to 4% and slow economic growth, the Bangko Sentral ng Pilipinas (BSP) kept its policy rates steady in the February meeting but it recently raised its full-year 2021 inflation forecast to 4.2% from its previous forecast of 4%. BSP Governor Benjamin Diokno stated that amid a manageable inflation outlook, subdued demand pressures, and within-target inflation expectations, the BSP has scope to preserve monetary policy in support to the economy to help strengthen overall demand and ensure market confidence.

With this, commercial banks continue to offer interest rates below the 1% level for their one to three month tenors. Meanwhile, Treasury bills averaged higher across all tenors versus last quarter with the 91-day and 182-day ending at 1.208% and 1.489% respectively. The 1-year Treasury bill closed the quarter at 1.889%.
