INVESTMENT OBJECTIVE AND STRATEGY

The Maybank Tiger Peso Short Term Fund primarily aims to achieve for its participants liquidity and slightly higher income potential by investing in a diversified portfolio of bank deposits and government bills.

CLIENT SUITABILITY

A client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Maybank Tiger Peso Short Term Fund is suitable for clients with a conservative risk profile and short-term investment horizon. This Fund is for clients who desire potential returns higher than traditional bank deposits.

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	The possibility of an investor to experience losses due to changes in interest rates.
Inflation Risk:	This is the risk that arises from the changes in purchasing power due to inflation.
Market Risk:	This is the possibility that an investor may experience losses due to changes in market prices of securities.
Liquidity Risk:	This is the possibility that an investor may experience losses due to the inability to sell or convert assets into cash immediately or instances where conversion to cash is possible but at a loss.
Credit / Default Risk:	This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.
Reinvestment Risks:	This is the possibility that an investor may experience losses due to probable lower returns or earnings when maturing funds or the interest earnings of the Fund are reinvested.
Other Risks:	Participation in the Fund may also be further exposed to any actual or potential conflicts of interest in the handling of in-house or related party transactions by the Trustee.

OUTLOOK

In the third quarter of 2024, the Philippines showed signs of easing inflation and strong economic resilience. Despite briefly rebounding in July 2024, inflation continued to ease with the headline inflation in September 2024, charting 1.9%, well below the BSP's target of 2% to 4% for 2024. The declining inflation gave the Monetary Board some room to start cutting rates. On August 15, 2024, the MB started its quantitative easing by reducing its policy rates by 25 bps to 6.25% from the over 17-year high of 6.5% marking its first cut in nearly four years. With the Federal Reserve's larger-than-anticipated rate cut of 50 bps to 5% on September 18, the Monetary Board has indicated, that if inflation remains subdued and growth support is deemed necessary, they can still afford to cut the interest rates further to match the Fed's cut. On September 20, 2024, BSP also announced reduction of the Reserve Requirement Ratio (RRR) by 250 bps to 7% for universal and commercial banks and nonbank financial institutions with quasi-banking functions, 200bps to 4% for digital banks, 100 bps to 1% for thrift lenders and 100 bps to 0% for rural and cooperative banks, effective October 25. With the lower interest rate environment and signals of less restrictive monetary policy ahead, yields on government securities saw a decline. The Fund will gradually increase duration to take advantage of higher-yielding securities while ensuring liquidity.
